8. Platoons of border guard units which had a strength of 33 men and were located close to the border were transformed into companies and strengthened to 120 members of the Security Army. These companies included the ones which are subordinated to the battalions at Dolni Zandov and Cheb, and they are to form the first line at the border zone. Platoons located 3-7 km from the border and having a strength of 33 men were transformed into companies and strengthened to 60 men. They are to form the second line. Some of these platoons are located at Palic, Vysoka and Tri Sekery.
9. The border guard units of the Security Army have been established according to the Soviet pattern for the purpose of sealing the border. Because of the reorganization of the PS units, the laying of mines in the border territory has been interrupted. Each company guards 3-4 km along the border.
10. All members of the Security Army are armed with model 49 submachine guns of Czech make, 9 mm caliber, with two magazines each holding 42 cartridges; hand grenades; and CZ pistols, 7.65 mm caliber, having a fixed barrel which can be easily disassembled. Each company headquarters has at its disposal one combat armored car of the "Bronovik" type, which is to be replaced by the Tatraplan car because the "Bronovik" and Tudor types are not effective on the border zone terrain. The Tatraplan has reportedly a front and rear drive and a higher chassis. In addition to this combat car, each company has one 2½ ton truck of the type RND.
